## *Pergola Rafter Tail Templates*

*Rafter tails can add an individual look to your pergola. They can be as plain or as fancy as you wish to make them!*

*These rafter tails have been designed with a 9" overhang but can easily be extended to the length you prefer by just adding to the left-hand side measurement. Always have the notches to the far left-hand side.*

*The templates are ready for you use.*

- 1. Print the template of your choice. Do this by selecting 'Print Current Page' in your printer window.*
- 2. Cut around the shape.*
- 3. Transfer it to a piece of stiff card, or thin wood, if you have any.*
- 4. Mark the exact thickness of your rafter wood onto the template labelled 'Top Notch' and 'Bottom Notch'. Do this on both sides.*
- 5. Draw around the template onto one end of your rafter.*
- 6. Flip over and mark on the other end of the rafter, making sure that the template is the correct way up as you do this!*
- 7. Cut the rafter tail ends. You will need a jigsaw if you are using a curved rafter template.*

*Here's to a fabulous looking pergola!*
